

Road Atlas of Boundary County, Idaho

Introduction

This is the fifth edition of Map Metric's Road Atlas of Boundary County, Idaho. Boundary County has been in a period of road name transition. This book shows both new and (old) road names. Address ranges are now included in the index.

Sources

Map Metrics is grateful to Gary Falcon, Boundary County's GIS coordinator for road line data. Additionally, we integrated USFS map data, Idaho Bureau of Lands roads, and Federal Geograph names. Road lines are current as of publication.

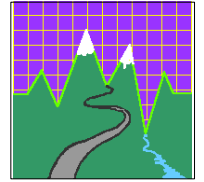

Data Quality

We have proofed the road lines over USDA aerial photography for 2004. Newer roads may not show. Trail lines come from USFS and USGS data. They may not be exact. Unnamed roads may not be passable. Road surface types are approximate.

We invite your suggestions or corrections for this book. Map Metrics publishes Road Atlases for counties in Northeast Washington and North Idaho that are designed for use by Emergency Services.
